

EDUCATIONAL TECHNOLOGY INTEGRATION POSTBACCALAUREATE CREDIT CERTIFICATE PROGRAM

Person-in-Charge	Heather Zimmerman
Program Code	EDTECH
Campus(es)	World Campus

Educators gain competencies in how to effectively teach with learning technologies in this nine-credit certificate program. Educators also learn design principles for including learning technologies into lessons, workshops, and professional development experiences. At the end of the certificate, educators will be able to teach and create interactive in-person, hybrid, and online learner-centered educational activities. The certificate is for educational professionals interested in careers in industry, government, higher education, cultural institutions, K-12 schools, and community-based organizations. The three courses in this certificate can be applied to the M.Ed. in Learning, Design, and Technology.

YOU MIGHT LIKE THIS PROGRAM IF..

- You are passionate about teaching using instructional technologies to effectively engage workers, students, volunteers, and trainees in educational programs.
- You seek to develop lessons, workshops, or professional development opportunities using current theories of learning and instruction.
- You are pursuing a career in teaching or learning design (e.g., K-12 teacher, collegiate instructor, learning engineer, instructional designer, out-of-school educator, workforce development professional, or museum educator).

Effective Semester: Spring 2025

Expiration Semester: Spring 2030
