

HEALTHCARE INNOVATION AND ENTREPRENEURSHIP GRADUATE CREDIT CERTIFICATE PROGRAM

Learning Outcomes

The Graduate Certificate in Healthcare Innovation and Entrepreneurship, offered by Penn State Harrisburg and the College of Medicine in conjunction with the Center for Medical Innovation (CMI), embodies the multi-faceted, multidisciplinary nature of medical innovation. The program's key learning objectives include:

1. Learning foundational innovation and entrepreneurship concepts and theories to identify current and future opportunities in healthcare.
2. Understanding the significance of leading a culture of innovation in partnership with other innovators to translate life science discoveries into real-world solutions.
3. Developing the ability to innovate effectively in multidisciplinary teams, from medical technology ideation through development to realization and commercialization.

Upon completing the certificate, graduates will be equipped to lead a culture of healthcare innovation and entrepreneurship in the workforce, ultimately improving patient outcomes.
