

LAW, POLICY AND ENGINEERING GRADUATE CREDIT CERTIFICATE PROGRAM

Person-in-Charge	Christine Kirchhoff
Program Code	LPE
Campus(es)	University Park

This certificate will help graduate students develop the knowledge, skills, and competencies to understand and apply tech theory, policy and practice; policy for science and science for policy; and complex systems with the goal of driving innovation and change. Students will acquire strong technical and analytical skills in systems thinking, how to communicate effectively across disciplines and outside academia with policy makers and practitioners, and apply their understanding of how engineering, law and policy intersect and drive (or constrain) the development and advancement of ethical and sustainable technical, scientific or systems solutions to complex problems in our global society.

Effective Semester: Fall 2026

Expiration Semester: Fall 2031
