

LINGUISTICS

Learning Outcomes

1. **KNOW:** Define and explain the major domains of linguistic structure (e.g., phonology, morphology, syntax, semantics), and describe and compare the major theoretical approaches to each.
2. **APPLY/CREATE:** Identify how Linguistics provides new perspectives on, or alternative explanations for issues in the major field of study.
3. **COMMUNICATE:** Explain concepts, data, or issues in linguistics to audiences in the major field without a background in linguistics, and to non-specialist audiences.
4. **THINK:** Integrate concepts and theories from Linguistics with their work in the major field.
5. **PROFESSIONAL PRACTICE:** Adhere to established practices in Linguistics for describing data and constructing explanations.
