

SPEECH-LANGUAGE PATHOLOGY

Learning Outcomes

1. Synthesize the principles and practices of ethical conduct within the profession and apply those to a diverse set of clinical applications.
2. Apply the knowledge of concepts, theories, and best practices to solve problems pertaining to human communication and swallowing disorders.
3. Interpret evidence-based information and apply that information to a variety of clinical settings across diverse populations.
4. Communicate effectively in both written and oral formats while recognizing and respecting the needs and values of diverse populations.
5. Summarize the benefits of fostering interdisciplinary collaboration through interprofessional clinical education and experiences that involve the client, families, and the community.
