

SPEECH-LANGUAGE PATHOLOGY

Graduate Program Head	Raffy Luquis
Program Code	SLP
Campus(es)	Harrisburg (M.S.)
Degrees Conferred	Master of Science (M.S.)
The Graduate Faculty	View (https:// secure.gradsch.psu.edu/gpms/? searchType=fac&prog=SLP)

The Master of Science in Speech-Language Pathology is designed to prepare students to prevent, assess, diagnose, and treat clients/patients across the lifespan who have delayed, disordered, or atypical abilities in speech, language, communication, cognition, swallowing, and hearing. The program addresses a growing need for clinical expertise through acute care courses that are not routinely offered in other graduate SLP programs. Students graduate with proficiencies that will allow them to flourish in a variety of adjacent career choices and with a variety of patient populations: from the youngest to the oldest in schools, hospitals, outpatient clinics, and rehabilitation centers.

Students will gain clinical competencies by working in conjunction with Hershey Medical Center, the Penn State College of Medicine, and related community partners, while also working to address the growing need for healthcare and medical research in the Harrisburg region.

The program is intended for full-time students. Courses will be scheduled for fall, spring, and summer semesters. Admission is encouraged for the fall semester. Spring admission is reserved for exceptional circumstances on a case-by-case basis.
