

AGRICULTURAL AND BIORENEWABLE SYSTEMS MANAGEMENT, B.S.

Seven Penn State campuses are scheduled for closure after Spring 2027: DuBois, Fayette, New Kensington, Mont Alto, Shenango, Wilkes-Barre, and York. New students are not being admitted at these campuses.

Begin Campus: Any Penn State Campus

End Campus: University Park

Program Learning Objectives

- Graduates will demonstrate knowledge of engineering technologies, sales, marketing, management and safety principles as they pertain to agricultural and biorenewable systems.
- Graduates will analyze and interpret data and demonstrate an ability to draw sound conclusions from data.
- Apply technical methodology and systems analysis skills to identify and solve problems for effective decision making in the operations and management of agricultural and biorenewable resource industries.
- Communicate, both orally and in writing, business and technical concepts within the context of agricultural and biorenewable industries.
- Graduates will demonstrate knowledge of ethics and social justice issues including issues of race and equity and be able to practice ethical decision making.
