

LANDSCAPE ARCHITECTURE, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description

Landscape architecture is the art of design, planning, or management of the land and of the natural and built elements upon it. As an academic discipline, it embodies creative, cultural, philosophical, and scientific knowledge bases. As a professional discipline, the practice of landscape architecture includes site design, urban design, master planning, community planning, regional planning, resource conservation, and stewardship.

The Minor in Landscape Architecture allows greater accessibility to the knowledge domains within the professional accredited Landscape Architecture major. The minor, as a non-professional opportunity, provides students with a broad understanding of the history, practice, and theories of how landscape architecture shapes the world, as well as the opportunity for more specialized study in selected topics.

The minor is flexible so that students can tailor their course choices to accommodate individual interests. Students should seek the advice of the minor adviser for course selection.

This minor is appropriate for students wishing to gain a greater understanding of the landscape architecture discipline as it complements many other professions dealing with natural systems management, site and urban design, master planning (community and regional), graphic information systems, resource conservation and stewardship, and landscape history/preservation.

What is Landscape Architecture?

Landscape architecture is an important change agent design profession for the 21st century addressing both social and environmental challenges of our times. Landscape architects are licensed professionals who design places that have beneficial impacts on the health and resilience of our ecosystems, our communities, and ourselves—places of delight, of wonder, of comfort, and of respite that include parks, plazas, campuses, gardens, memorials, green roofs, interactive installations, commercial centers, transportation corridors, waterfront developments, and so much more. In their work, landscape architects are guided by commitment to social, environmental, and economic benefit.

You Might Like This Program If...

- You are creative, active, involved.
- You want to be an agent of change and solve problems.
- You are passionate about sustainability.
- You are fascinated by people and cultures; inspired by history and traveling.
- You like technology and hands-on work.
- You enjoy working with a team and you want to design for the 'big' issues.
- You want to engage with art, nature, and design to unlock powerful solutions for the complex issues of today and tomorrow.
