

MUSIC TECHNOLOGY, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description

Administered by faculty from the College of Arts & Architecture's School of Music, School of Theatre, and Department of Integrative Arts, the minor in Music Technology is appropriate for undergraduate students seeking to apply domains of knowledge from their majors or General Education programs to issues of audio production and digital technology in music.

The program consists of prescribed foundation courses in musical acoustics, digital audio, sound design, and audio recording. Supporting coursework allows students to focus on advanced topics such as music software programming, multi-media, or entertainment systems.

What is Music Technology?

Music Technology involves the interaction between musical creation and performance with technology and research. It encompasses audio recording, digital audio, sound design, musical acoustics, music and medicine, and more.

You Might Like This Program If...

You have interests in audio engineering, sound production, and music research and have a background in music and computer software.

While open to students pursuing any major, the music technology minor combines well with majors in music, theatre sound design, integrative arts, film production, communication sciences and disorders, information science and technology, and computer science.
