

PSYCHOLOGICAL SCIENCE, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Career Paths

The minor in Psychological Science can be pursued by students in most Penn State Behrend degree programs. In addition to core topics, students pursuing the minor may take courses in applied areas such as clinical, counseling, industrial-organizational, or human factors psychology. Penn State Behrend has a comprehensive support system to help you identify and achieve your goals for college and beyond. Meet with your academic adviser often and take advantage of the services offered by the Academic and Career Planning Center beginning in your first semester.

Careers

Regardless of the career path you choose, your interactions will involve other people. For that reason alone, a minor in Psychological Science is valuable. What will convince someone to use your service? Can your product be made more user-friendly? How do you motivate your customers or your students? These are some of the questions that the minor seeks to answer.

Opportunities for Graduate Studies

A minor in Psychological Science demonstrates to graduate school admissions committees your commitment to scientific, conceptual, and interdisciplinary thinking. Penn State Behrend offers a Master of Arts degree program in Applied Clinical Psychology that includes optional preparation for the Licensed Professional Counselor (LPC) credential.
