

OCCUPATIONAL THERAPY, A.S. (BERKS)

Seven Penn State campuses are scheduled for closure after Spring 2027: DuBois, Fayette, New Kensington, Mont Alto, Shenango, Wilkes-Barre, and York. New students are not being admitted at these campuses.

Begin Campus: Berks

End Campus: Berks

Program Description

The Associate in Science in Occupational Therapy Assistant Program prepares students to work in numerous practice settings, guided by the supervision of occupational therapists. Across the lifespan, individuals engage in meaningful occupations. Learning, playing, working, resting, and caring for self and others are among the occupations of life. A physical or psychological challenge may hinder an individual, group, and/or community from participating fully in meaningful occupations. Occupational therapy makes it possible for people to maintain or reclaim independence; thereby positively engaging in Living Life to its Fullest™. Upon successful graduation from the program, students must sit for and successfully pass the National Board for Certification in Occupational Therapy (NBCOT) national certification examination to practice. Most states also require licensure as a condition for employment. A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination and obtain licensure. NBCOT may be contacted at:

NBCOT
One Bank Street
Suite 300
Gaithersburg, MD 20878
301-990-7979
www.NBCOT.org (<http://www.NBCOT.org>)

To enter this major, students must have a high school diploma or its equivalent. To be admitted to degree candidacy, the applicant must have completed educational background requirements called Carnegie Units or Secondary School Units. Students are responsible for proof of liability insurance and other requirements specified by the facility providing supervised field experience.

The size of each entering class is limited so that optimal clinical experiences and practical application situations can be maintained. Students are expected to progress through the program in the prescribed manner. Fieldwork affiliations are maintained within a specified geographical area. Students may be required to make special housing and transportation arrangements during the fieldwork phase. Students must complete all Level II fieldwork within eighteen months of successful completion of OTA didactic course work. The 20TCC and 20TBL curricula are delivered in five semesters.

What is Occupational Therapy?

Occupational therapy is a practice informed by physical, psychological, and occupational science. It is with these skills and knowledge; occupational therapy assistants employ intervention plans that engage people in maintaining or reclaiming independence. A physical or psychological challenge may hinder an individual, group, and/or community from participating fully in meaningful occupations. When

this occurs an occupational therapy assistant works with the client(s) to design a plan to Live Life to its Fullest™. As a certified occupational therapy assistant, you will work in numerous practice settings, guided by the supervision of occupational therapists. Most importantly, by choosing a career in occupational therapy, you will be at the forefront in making a difference in people's lives by way of therapeutic use of self and an intentional relationship.

You Might Like This Program If...

You want to work with individuals and groups across the lifespan. Occupational Therapy Assistants work in rehabilitation and acute care hospitals, skilled nursing facilities, schools, community health centers, mental health facilities, pediatric specialty settings, and higher education, and can also create their own niches in a variety of settings. If you appreciate helping to solve problems and empower people, being an occupational therapy assistant may be the right fit for you!
