

COMMUNICATION SCIENCES AND DISORDERS, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Program Description

Communication is vital to all aspects of life and is fundamental to human development, health, and wellness. Communication differences and disorders occur across the lifespan and may impact the ways in which people participate in educational, vocational, health-care, community, and social activities. The Communication Sciences and Disorders (CSD) minor helps students appreciate the wide variety of communication differences and disorders that exist in the field of Communication Sciences and Disorders. This may include working with individuals in areas such as speech, voice, language, and hearing.

Students who minor in Communication Sciences and Disorders are better prepared to identify and support individuals with speech, language, and hearing differences and disorders across the life span.

Note: This minor does not by itself prepare students for admission to graduate programs in speech-language pathology or audiology.

You Might Like This Program If...

- You are interested in a future career in education or health care settings where you are working with individuals with communication differences or disorders.
- You are planning a future career in speech language pathology, audiology, psychology, linguistics, neuroscience, or education.
