Military Studies Minor

This interdisciplinary minor (<https://bulletins.psu.edu/undergraduate/colleges/intercollege/military-studies-minor/>) is designed for all students with special interests in military and national security affairs. Military emphasis is provided in one of three areas: Aerospace Studies, Military Science, or Naval Science. American military forces have played an important role in our domestic and international history and will continue to have significant involvement in policy arenas relating to national security and international relations. Students elect one military service branch for their prescribed courses and select two additional courses from appropriate history and political science courses emphasizing national security policy. At least 6 credits must be taken at the 400 level.
